

BC Health Research Connection Project

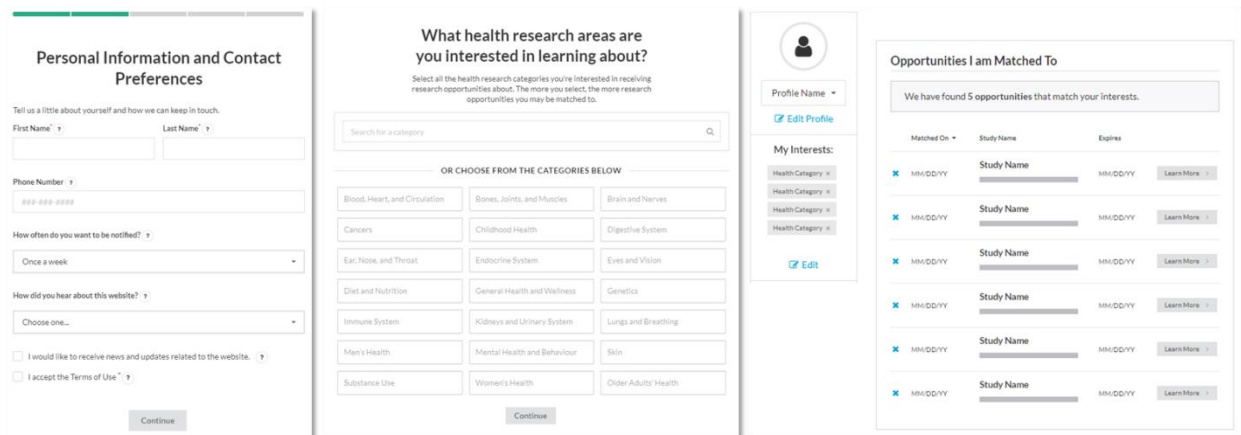

APRIL 2018 UPDATE

Development News

The BC Health Research Connection Project team has been busy with the continued development of the provincial platform, including working on website wireframe designs and finalizing user requirements in order to begin implementation/development of the platform website and database system.

Example Website Wireframe Designs

Community Engagement in Interior, BC

On February 15, 2018, we met with the Ktunaxa Nation Elders at the Aboriginal Gathering Place, College of the Rockies in Cranbrook. The purpose of the meeting was to provide information about the project and seek feedback from group regarding the project's objectives and processes. The engagement was planned in collaboration with the [BC SUPPORT Unit Interior Centre](#).

Ktunaxa Nation Elders with facilitators at Feb 15th meeting

Key Accomplishments to Date

- Completion of community engagement dialogues across BC
- Completion of wireframe designs (a model of the website pages to review functional elements)
- User requirements reviewed by Pilot Sites (groups who will be assisting with registering patients/public volunteers) and the Patient Advisory Group
- Brand exploration and visual identity
- Website content writing
- Beginning of implementation/build of website and data system

Upcoming Project Activities

- Planning testing sessions with a prototype platform with pilot sites and patient partners
- Development of Standard Operating Procedures and training materials for researchers
- Development of marketing and public relations plan for launch
- Development of outcomes evaluation plan
- Presentation at Fraser Health Research Week (June 15th)
